## The next step in HVAC drives

The new ACH580 drives come with a range of advanced features, such as a new primary settings menu that makes commissioning the drives much easier and faster. Optional Bluetooth® connectivity offers improved accessibility for drives in remote areas and increases safety by letting users stay out of arc flash danger zones.

### Simple to select, install and use

All the essentials including DC chokes, EMC filters, cabling clamps, certified BACnet communication, and enclosures from UL (NEMA) Type 1 to UL (NEMA) Type 12 are a standard part of the drive. Simplifying selection, installation, and commissioning.

### Safe maintenance

The packaged disconnect solution provides a main disconnect switch, further increasing safety for people working on air-handling units.

### Motor control options to meet your application needs

ACH580 drives can be integrated with several types of AC motors, including Permanent Magnet (PM), synchronous reluctance (SynRM) motors and Ferrite Assisted SynRM (FASR) including EC Titanium™. Using these motors can reduce your energy costs even more.

### Additional I/O options

Take advantage of the added flexibility and accessibility — never be without back-up I/O points at the job site again.

We stock VFD units and replacement parts to meet all of your HVAC needs.

**Call or visit MPN Parts today!**

ACH580 drives are ideal for HVAC fans, pumps, compressors, air-handling units, and chillers. These are used in hospitals, data centers, shopping centers, tunnel ventilation, factories, office buildings, and more.

### Intuitive control panel

The drive's HVAC-specific software, intuitive control panel with customizable text, and menu-driven programming simplify setup and operation of even the most complex applications. You can customize the view so that it only shows the information you need, and it automatically saves a backup of your most recent configuration so that it's always available.

### Optional Bluetooth capability

ABB's new HVAC Bluetooth control panel lets you commission the drive remotely, safely outside the arc flash boundary. The Drivetune smartphone app allows you to commission and tune the drive from a distance, giving you access to the same primary settings and other menus available on the drive's HVAC control panel.

### Reliable communication

BTL certified BACnet MS/TP, Modbus RTU, and Johnson Controls N2 are embedded in every ACH580. In addition, a wide range of optional fieldbus adapters, including DeviceNet, LonWorks, PROFIBUS DP, Ethernet, Modbus TCP, PROFINET IO and BTL certified BACnet/IP, are available to enable connectivity with all major building automation and control systems.

### Harmonic mitigation

The drive provides reduced harmonics with built-in, DC choke in a small and lightweight design.

### Ultra-Low Harmonic (ULH) drive for a clean electrical network

The revolutionary ACH580 Ultra-Low Harmonic drive is designed specifically for the HVAC market, minimizing the effect of harmonics on your system. This all-in-one solution is fully integrated within the ACH580 platform and leverages the same programming tools, user settings, options, and functions, while providing superior harmonic performance.

### Broan LP510R, LP510RS & LP510RSL fans maintain CFM up to 0.4" static pressure.

# QTDC™ simplifies the way you work.

### Energy Efficient Brushless Motor Design

At 1/3 the size of a standard fan motor, our new brushless DC motor:

- Provides more room to move air more quietly.
- Lasts longer than standard motors.
- Weights less to simplify overhead installation.

### Twice the ENERGY STAR® Efficiency Standard

QTDC™ continues to save money long after installation. The brushless DC motor achieves 90% efficiency so you can feel good about letting it run while keeping the air more comfortable.

### QTDC™ at a glance

- Choose fan or LED fan/light models with or without Sensaire® humidity sensing technology.
- Sensaire® Sense on Rise technology on fan model QTXE110150DCS and fan/light model QTXE110150DCSL.
- TrueSeal™ damper technology creates an airtight seal from inside the housing.
- 6" round duct connector to reduce static pressure in ducting.
- UL Listed for use over bathtub or shower when connected to a GFCI protected branch circuit.
- Type IC, fits 2" x 8" and larger construction.

### Flangeless housing simplifies installation.

**Switch between 110, 130 or 150 CFM**  
You'll have fewer fans to inventory and the right size at installation. Switch the CFM to meet room requirements as well as ASHRAE 62.2 for spot and dwelling unit ventilation.
